

DAVID A. HILL  
17 January 1957.

Revue Algologique n.s. 2:53-71, 1956.

Droop, M.R. "Haematococcus pluvialis & its allies"  
p.57, figs. 19-20 especially, indicate unilinear  
inheritance of flagella and stigma.

I think this is the sort of thing you were asking  
about.

(M.R.D. is one of the  
best young phycologists  
around.)

Best wishes -

Reyn
